Looking for an alternative option to living in a facility?

Accessing 24 hour care with MDS is a comprehensive and cost effective option to Supported Independent Living as opposed to sharing support in a group based accommodation facility. This option does not involve any out of pocket expenses and provides greater flexibility with choice and control as you are in your own home and in charge of all decisions relevant to your home maintenance and weekly expenses.

Melbourne Disability Services offers 24/7, round the clock care for participants who wish to be supported to live Independently at home. We offer tailored support services that are person-centred and provide customised solutions to your particular needs. We work with you to understand your needs, goals, preferences and establish a support system that works for you. You choose your support workers and personal care team and decide if they are right for you!

Prefer one of our homes instead?

We have various housing options available throughout Metro Melbourne that are a mix of units, townhouses and standalone homes. We can support you to find the right home for you or your loved ones by gaining an understanding of your preferences and what you are looking for in your new home such as location, budget, type of housing, local amenities etc. We also consider many aspects of you and your lifestyle so we can match you with other residents that you will likely get along with such as other residents of similar age and interests so you can live with people you enjoy being around.

We **LISTEN** to what **YOU** want to get out of **YOUR NDIS PLAN** and develop a plan to **ACHIEVE IT**.
